The information collected is entered into the USDA "Releases of Beneficial Organisms in the United States and Territories" (ROBO) database, established in 1984. It is a cooperative program among USDA and other federal agencies, state governmental agencies, and U.S. universities. The use of the forms and the information provided is voluntary. The program is for the benefit of biological control research and action agency personnel, taxonomists, federal and state regulatory agencies, agricultural administrators, and the general public. Efforts are underway to replace the paper forms with computerized information collection, and when completed, the forms would be used by those units for which computerized input is not possible.

**Estimate of Burden:** Public reporting burden for this collection of information is estimated to average  $\frac{1}{12}$  hour per response.
